***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
3. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-12, drawn to a filter element fixation piece.

Group II, claim(s) 13-15, drawn to a method of making a filter.

4. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: All the common features of claims 1 and 13: a piece of thermoplastic bonding agent mixed with metal powder are known, as shown for example in U.S. 4,765,859 and WO 99/37379. Therefore these features are not special technical features. Claim 1 has the special technical feature that the piece be flexible, which is not required in claim 13. Claim 13 has the special technical feature of being annular and requiring guide means, which is not required of claim 1. Accordingly Groups I and II do not have a common special technical feature.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
